Lab - Research Laptop Specifications

Laptops often use proprietary parts. To find information about the replacement parts, you may have to research the website of the laptop manufacturer.

Before you begin this lab, you need to know some information about the laptop.

Your instructor will provide you with the following information:

Laptop Manufacturer:	DELL Inc.
Laptop Model Number:	G3 15 3579
Amount of RAM:	32 GB
Size of the Hard Drive:	1 TB 5400 RPM HDD

Answer the following regarding your laptop model.

1. Use the Internet to locate the website for the laptop manufacturer. What is the URL for the website?

   https://www.dell.com/en-ph

2. Locate the service section of the website and look for links that focus on your laptop. It is common for a website to allow you to search by the model number.

   List the links you found specific to the laptop and include a brief description of the information in that link.

   - ***Dell G3 15 Setup and Specifications — https://www.dell.com/support/manuals/en-ph/g-series-15-3579-laptop/dell-g3-3579-setupandspecifications/set-up-your-dell-g3-3579?guid=guid-d0f3a9b3-b68d-4072-8770-12e5363766d1&lang=en-us***
   - ***Dell G3 15 Service Manual — https://www.dell.com/support/product-details/en-ph/product/g-series-15-3579-laptop/resources/manuals***
   - ***Dell G3 3579 Support Page — https://www.dell.com/support/product-details/en-ph/product/g-series-15-3579-laptop/overview***

3. *Briefly describe any service notices you f*ound on the website. A service notice example is a driver update, a hardware issue, or a recall notice for a laptop component.

   I found Dell support information concerning swollen lithium-ion batteries. Dell provides safety guidelines explaining how to recognize and handle a swollen battery. I also found current Dell troubleshooting information for laptop overheating and guidance on installing drivers in the correct order.

4. Open forums may exist for your laptop. Use an Internet search engine to locate any open forums that focus on your laptop by typing in the name and model of the laptop. Briefly describe the websites (other than the manufacturer website) that you located.

   I found several discussions from Reddit's r/Dell involving Dell G3 15 3579:

   - ***One discussion reports a loose/unstable touchpad, with the owner stating that the touchpad had already been replaced twice.***
   - ***Another discussion describes a black-screen/no-boot problem, where the keyboard and fans turn on but the display remains black. The user tried BIOS recovery, RAM reseating, CMOS replacement, and other troubleshooting steps.***
   - ***Another owner reported keyboard problems and battery swelling, with random keystrokes failing to register. Reconnecting or replacing the battery temporarily affected the problem.***
